Commercial and Industrial Fencing

Melbourne's Leading Fence & Gate Specialist

*We have a wide range of  
high quality commercial  
Tubular Fencing to suit  
your security requirements*

## COMMERCIAL TUBULAR FENCING

Commercial Tubular Fencing is a very popular choice for many industrial properties because it is very strong and secure. It is a great option for factories and warehouses.

This type of fencing comes in both traditional and contemporary styles and is especially popular for aged care facilities, schools and medical facilities.

Tubular fencing normally comes with a powder coated finish, which helps protect the metals from the elements and there is a wide range of colours to choose from.

### SPECIFICATIONS

Our standard range is listed below. If you can't find anything that suits you, contact us and we'll tailor something to your requirements.

Panel length	2400mm (non std sizes available on request)
Panel Heights	1800mm, 2000mm, 2100mm, 2400mm (non std heights available on request) If your application is for a school and it has a pressed spike, you must use a minimum 1800mm height to comply with Australian Standards
Gate width	1000 and 3000 opening (non std sizes are available on request).
Design	Face welded or Punched through the rail they both use 40mm x 40mm rails, (other options available on request)
Verticals	Std is 25mm x 25mm or 20mm x 20mm (other options available on request)
Post length	2400mm, 2700mm, 3000mm (other lengths are available on request)
Post diameter	66mm, 75mm and 100mm (other options available on request) We do not recommend going anything smaller than a 65mm post with this product due to panel weight
Colours	45 std Dulux colours available (please ask your rep for a sample)
Styles	Pressed spike or Rod top
Post styles	Flanged posts are available on request
Post caps	6 different post caps available
Fittings	Std fittings are D latch, striker and hinges
